WEFI Worldwide Reeve Collins Recent Panel Comments

WEFi Worldwide Reeve Collins Recent Panel Comments

"Why do you allow your bank one to three days to move money when the technology is there to move it in three seconds?" 🗣️

That's WeFi Co-Founder Reeve Collins, who also co-founded Tether, speaking at Consensus Miami.

And it's a question worth sitting with.

The answer is not complicated.
It was never possible before. And regulation kept it that way.

That's changing now. 🙌

MATHEMATICAL SUPPLY CONTROL

WEFI

🧠 What is MSC and why does it matter?

MSC is one of **4 algorithms in Cloud-Based Mining** that have been developed to ensure the **stability** and **growth** of the \$WFI asset.

It is an important **protection mechanism** inside the WeFi ecosystem.

Ensuring that the token economy remains **stable, resilient**, and **perfectly aligned** with real-world product adoption. 🛡️📊

It is not a random limitation.

WEFI

🧠 What is MSC and why does it matter?

Its purpose is to help **keep the system balanced, fair, and sustainable** for the community.

Unlike many other projects on the crypto market, **WeFi's revenue model does not rely on selling its own token.**

The company **does not** create any **token sell pressure** on the market.

→ **All of the \$WFI tokens belongs to the community.** □
